Native speaker

English

Intermediate

Interests

Running, Reading, Movies, Music, Art, Soccer, Design.

Professional Profile

A versatile graphic and digital designer with experience in brand identity, visual and editorial design, and social media content creation. I focus on visual consistency, typography, and storytelling, transforming goals and ideas into clear and recognizable outcomes. I'm a team player and am meticulous and organized when it comes to meeting deadlines. Tools: Figma, Adobe Photoshop, Adobe Illustrator, Canva; video editing: CapCut, DaVinci Resolve; backend/frontend coding: HTML, CSS, wireframing, prototyping, user flows, ClickFunnels Classic, WordPress.

Experience

Visual & Editorial Designer — @ssatrae

Creative collab - 2025

- Layout and graphic design of editorial content approved by the editorial staff.
- Creation of visual posts consistent with the magazine's visual identity.
- Selection and organization of visual and photographic elements to support published content.
- Collaboration with the creative team in the production of digital materials using Figma and Canva.
- Support for the project's visual communication, helping to improve user engagement.

Funnels & Conversion Designer – Growtize Training Program

Intensive Training Program - July–September 2025

- Participation in a practical and theoretical training program focused on designing sales funnels for online businesses.
- Creation of sales pages, opt-in pages, and complete funnel structures using ClickFunnels Classic and Canva.
- Study and application of Conversion Rate Optimization (CRO) techniques and principles of persuasive copywriting to maximize the effectiveness of the pages.
- During the program, I was tasked with completely redesigning the website of one of the group's companies: a project commissioned and highly appreciated by the team, which led directly to subsequent freelance work.
- Developed end-to-end skills in creating conversion-oriented user experiences (wireframes, layouts, visual optimization).

Junior Web & UX Designer — Growtize Holding

Freelance collab — November 2025 – June 2026

- Design and development of landing pages, sales funnels, and opt-in pages for online businesses.
- Creation of low- and high-fidelity wireframes in Figma + implementation on ClickFunnels Classic and WordPress.
- Production of supporting visual content (social media posts and YouTube thumbnails).
- Work as part of a remote team with weekly alignment calls.

Brand & Visual Designer — @lifestyle_archive_

Personal Project (Currently on hold) — 2026 – Present

- Development of the brand identity and magazine-style graphic design for a digital archive dedicated to lifestyles.
- Creation of visual editorial series dedicated to contemporary and historical icons (e.g., David Bowie, Kurt Cobain, Stanley Kubrick), with reels reaching up to 470,000+ organic views.
- Art direction, video editing, and layout of narrative content with a cinematic and curatorial approach, developing a consistent typographic and visual system across multiple formats (editorial carousels, quote cards, Reels).
- Organic growth of the channel to 23,000+ followers through a data-driven content testing strategy (formats, thematic clusters, persuasive copywriting).
- Design and development of a brand-linked e-commerce site (Shopify), featuring a line of print-on-demand posters and integration of an affiliate marketing program (Amazon Associates).

Brand & Visual Designer — @lostframe.cine

Personal Project (In Progress) — 2026 – Present

- Development of the brand identity and design system for LOST FRAME, an editorial website dedicated to cinema (movies, TV series, industry news), designed to be welcoming to both enthusiasts and those who engage with cinema only occasionally.
- Creation of a color system based on the temperature of cinematic lighting (cool background, warm accent concentrated in a single point) and a three-tier typographic system, translated into a comprehensive library of components: buttons, cards, navigation, forms, and labels to differentiate between editorial content and current news.
- Design of the visual identity and logo: exploration of five symbolic concepts built around the brand name rather than classic cinema iconography; development of the chosen variant in all its forms (horizontal, icon, favicon) with specific rules for spacing and usage.
- Definition of the tone of voice and editorial guidelines: a direct, informal, and expert tone free of technical jargon, with explicit rules against spoilers, industry clichés, and text structures recognizable as AI-generated.
- Application of the system to social media formats (covers featuring the movie image and a brand overlay, in 1:1, 4:5, and 9:16 aspect ratios), creation of taglines, bios, and account names, consistent with the defined verbal identity.

Education and Training

High School Diploma

Stendhal High School, Rome — 2023

- Specialization in Graphic Design.
- Final grade: 80/100.

Master in UX/UI Design

Start2Impact University — 2024 - 2025

- A program focused on the complete UX/UI design process: user research, wireframing, prototyping, UI design, and testing.
- Development of 10 individual portfolio projects, with a hands-on approach and real-world scenarios.
- Acquisition of a solid design thinking methodology and modern tools (Figma, user research, user flows).

Portfolio
